

Logistics Standard Operating Procedure

Document No: SOP-LOG-01 | Effective Date: 01-Jul-2025

1. Purpose

This SOP governs outbound transportation planning, vehicle scheduling and shipment tracking for deliveries from VOLTORA's Edappally warehouse to customers across Kerala and neighboring states.

2. Route Planning

Delivery routes are planned weekly based on the Delivery Schedule, consolidating orders by destination region to maximize vehicle fill rate and minimize freight cost per unit - important given VOLTORA's limited logistics budget.

3. Vehicle Allocation

Vehicles are allocated based on order volume/weight against VOLTORA's small in-house fleet of 1 delivery vehicle, per the Vehicle Details register. Third-party transporters are engaged for inter-state deliveries and routes exceeding in-house fleet capacity.

4. Shipment Tracking

All dispatched shipments are tracked using the Shipment Tracking Report, updated at each checkpoint (dispatch, in-transit, delivered) and shared with the Logistics & Warehouse Executive.

5. Proof of Delivery

Drivers must obtain a signed Delivery Challan from the customer as proof of delivery, which is filed against the corresponding Sales Order and Invoice.
