

Capacity Planning Report - Q1 FY 2026-27

Prepared by: Anoop K. Nair, Production Supervisor

Work Center	Available Capacity (hrs/month)	Planned Load (hrs/month)	Utilization %
Assembly Station	320	265	83%
Test Station	320	290	91%
QC Station	320	175	55%

Observation

With only 2 assembly technicians on the single Assembly Line, Test Station utilization is nearing capacity at 91%. Given VOLTORA's limited budget, cross-training the Electronics Design Engineer on testing duties is recommended over hiring additional staff.
