

Quality Manual

Document No: QM-01 | Effective Date: 01-Jul-2025 | Version 1.0

1. Quality Policy

VOLTORA Manufacturing Pvt. Ltd., a small and medium enterprise (SME), is committed to manufacturing standardized LED lighting, power electronics and IoT-enabled products that consistently meet customer and regulatory requirements through continuous improvement, defect prevention and supplier quality management - within the company's limited operating budget.

2. Quality Management System

The company maintains an ISO 9001:2015 certified Quality Management System covering incoming inspection, in-process control, final inspection and corrective/preventive action (CAPA) processes, administered by a single Quality Assurance Executive given the company's lean 12-person team.

3. Incoming Quality Control

All components (LED chips, PCBs, batteries, transformers, chips, solar panels, relays) are inspected per the Incoming Inspection SOP prior to acceptance into inventory.

4. In-Process Quality Control

Production work orders include mandatory quality checkpoints defined in the Routing Sheet, verified by the Production Supervisor at each stage.

5. Final Inspection

Finished goods undergo final inspection and functional testing per documented product specifications before release to finished-goods inventory.

6. Non-Conformance & CAPA

Non-conforming material or process is logged in the Defect Report. Defects affecting more than 1% of a batch trigger a mandatory CAPA Report.

7. Supplier Quality

Suppliers are evaluated per the Vendor Evaluation Report and Supplier Performance Report, with a minimum defect-rate requirement of 1% specified in Supplier Contracts.
